SkyDoc™ Aerostat

SkyDoc™ Aerostat is the leader in aerostat technology

The SkyDoc™ aerostat was designed to meet the criteria required for use by military, law enforcement and civilian users for specialized payload deployment.

The SkyDoc™ aerostat has been developed through intense research of fabrics, materials and designs to the needs of these users.

The SkyDoc™ aerostat is designed with state of the art technology, offering optimum performance, reliability, and versatility to accommodate a wide variety of payloads such as; surveillance, research, communication and monitoring. The special design of the Sky-Doc™ aerostat allows for increased lift with increased winds. The aerostat stays aloft in Hurricane Force Winds
